ONICE

Onice is a collection designed to immerse you in the elegant immensity of its precious stones. It is inspired by Blue Onyx, a natural piece that comes from Pakistan and Iran. Its transparent background contrasts with the different shades of blue.

We have extended the possibilities of this mineral through a collection with new shades and a large format. This rectified porcelain tile fits into interior decoration projects, with a stately appearance and profound beauty. Onice has the mirror characteristic, which produces a mirror effect that provides continuity to the different pieces.
